

Sicherheitsnetze sind ein passives System zur Absturzsicherung. Das bedeutet, dass sie einen Arbeiter bei Arbeiten in Höhen schützen , even he is not attached to a lifeline. The purpose of the safety nets is to avoid or minimize the effect of a fall from heights.

Worker with lifeline and without safety net

***Worker with lifeline and with
safety net***

In comparison to individual protective system, the worker is always safe, while using other individual systems such as lifelines, temporary or definitive, the worker is safe just when he is attached.

In Visornets as **safety netting manufacturer Company** we are specialized in the production of **safety nets** and **collective system devices**. Please [discover us](#).
